

## AFM Recycling

- time is linear (?)

production → use → waste (At4)

- what you want to get rid of is waste (?)

↳ referring to Dutch legislation  
its not allowed to keep object  
f. do something else with it  
but needs to be taken apart/  
material recycled

→ no 'reuse' allowed }

as soon as classified as 'waste'  
(also targets digital devices / elec-  
tronics)

- many grey areas around

- e.g. in who classifies as  
waste

then

creating  
Mono streams of specific Mate-  
rials (e.g. copper, steel types)

70% of raw Material transition  
(reuse) in hands of china

30% of recycling in chinese hands

- company: origin in Metal trading

- today: 'circularity' instead of  
'sustainability'

- collecting and 'adding value' to  
picked up waste & Metals (mainly)

- analyzing what is it?

- registering legislation

- taking apart (+ destruction)
